RCC INSTITUTE OF INFORMATION TECHNOLOGY  
Affiliated to Maulana Abul Azad University of Technology  
CANAL SOUTH ROAD, BELEIAGHAT, KOLKATA-700015  
May, 2018

## **Abstract:**

ONLINE STUDENT TEST is a project developed to provide an easy way to develop student's skills. This project helps users by analysing the areas where students are weak and allows tests accordingly.

## **Introduction**

On-line Exam System is very much important for any Educational Organizations to prepare their students for any exams by saving the time. It will take check the paper and generate mark sheets as well. It will also help the Organization to test the students and develop their skills. But the disadvantages for this system are, it takes a lot of times when you prepare the exam at the first time for usage.

The effective use of "On-line Exam System", any Educational Institute or training centres can use it to develop their strategy for arranging the exams, and for getting better results in less time.

## **Modules:**

### **Owner**

Owner gets login by filling the registration form. Owner will get a unique username and password to enter into the site. Owner can give exam tests. Owner can get their scores instantly and by email also. Owner can buy subscription and can give exams further more.

### **Admin**

Admin gets login by valid username and password. Admin can add classes and questions along with answers and levels also. Admin can remove classes and questions also. Admin can view all the classes and questions details or levels. Admin verifies the registration details and provide questions to the students.

## **Advantages**

- Users can learn about subjects and topics as well.
- It saves user time in search of exam papers from different sites.
- The system provides a graphical view of the entire exam systems.
- It excludes the need of human efforts for managing question sets.
- The system generates online questions for requested class and topics and produces exact mark sheet.
- Cost-effective.

## **Disadvantages**

- It requires an internet connection.
- It requires large database.

## **Product Perspective**

This website is designed for the web-based browsers. There should be an internet connection for appearing these tests. This interface is very easy and can be maintained by anyone. This familiar GUI will make the user feel more comfortable navigating and viewing the data on our system. Once our application is loaded into browser it allows user to give online test and make themselves improved.

## **FEASIBILITY STUDY**

After analysing the scope of the project, the feasibility study is very essential to be held. It is basically keeping the following points in mind.

**Developing for meeting:** This website has met its scope. As there is no data involved in the system, processing of files.

The processing of this website is very simple as it has been designed in java script and it has been well divided into several functions according to the need.

### **ECONOMIC FEASIBILITY**

Economic analysis is most frequently used for evaluation of the effectiveness of the system. More commonly known as cost/benefit analysis the procedure is to determine the benefit and saving that are expected from a system and compare them with costs, decisions is made to design and implement the system

### **BEHAVIOURAL FEASIBILITY**

People are inherently resistant to change and computer has been known to facilitate changes. An estimate should be made of how strong the user is likely to move towards the development of computerized system. These are various levels of users in order to ensure proper authentication and authorization and security of sensitive data of the organization.

**Technically feasible:** This website is very much technically feasible. This website is very much concerned with specifying equipment and the website will successfully satisfy almost all the user's requirements. The technical need for this system may vary considerably but might include:

- a. The facility to produce report instantly after finishing exam.
- b. Response time under certain conditions.
- c. Ability to process a file at a particular speed.

Therefore, the basic input/output of all files is identified. So, the project can easily be build up and it will also be technically feasible.

**State of Art:** The project is very much within the state of art since the project is a WINDOWS based; it uses very modern and common technique.

## ***Online Student Test***

Beside it is very much modern and user friendly. It also works as middleware i.e. only in between the user and the file. So, it is completely a state of art project.

**Resources:** As motioned earlier that the resources are easily available and the cost of training is almost negligible. Sometimes situations may arise when it may not be so much easy. For a person completely unaware of using a computer system could result in a training cost or for a very small organization the purchase of a computer, instalment of the system and other charges may lead to a difficult matter.

**Touching User's mind:** The basic features of this software are simplicity, easily understandable, easily applicable. If this type of software is a new experience for the user is certainly going to be like it.

## **Project Category: Web-Based Application**

### **Available Technologies:**

Languages: HTML, PHP, JavaScript

RDBMS: Online MySQL

Web Server: wamp server

Development Platform: Adobe Dreamweaver, sublime

### **Tools Used:**

Editor Used: Adobe Dreamweaver for PHP, wamp server for MySQL

Operating System: Windows 10

### **Hardware Used:**

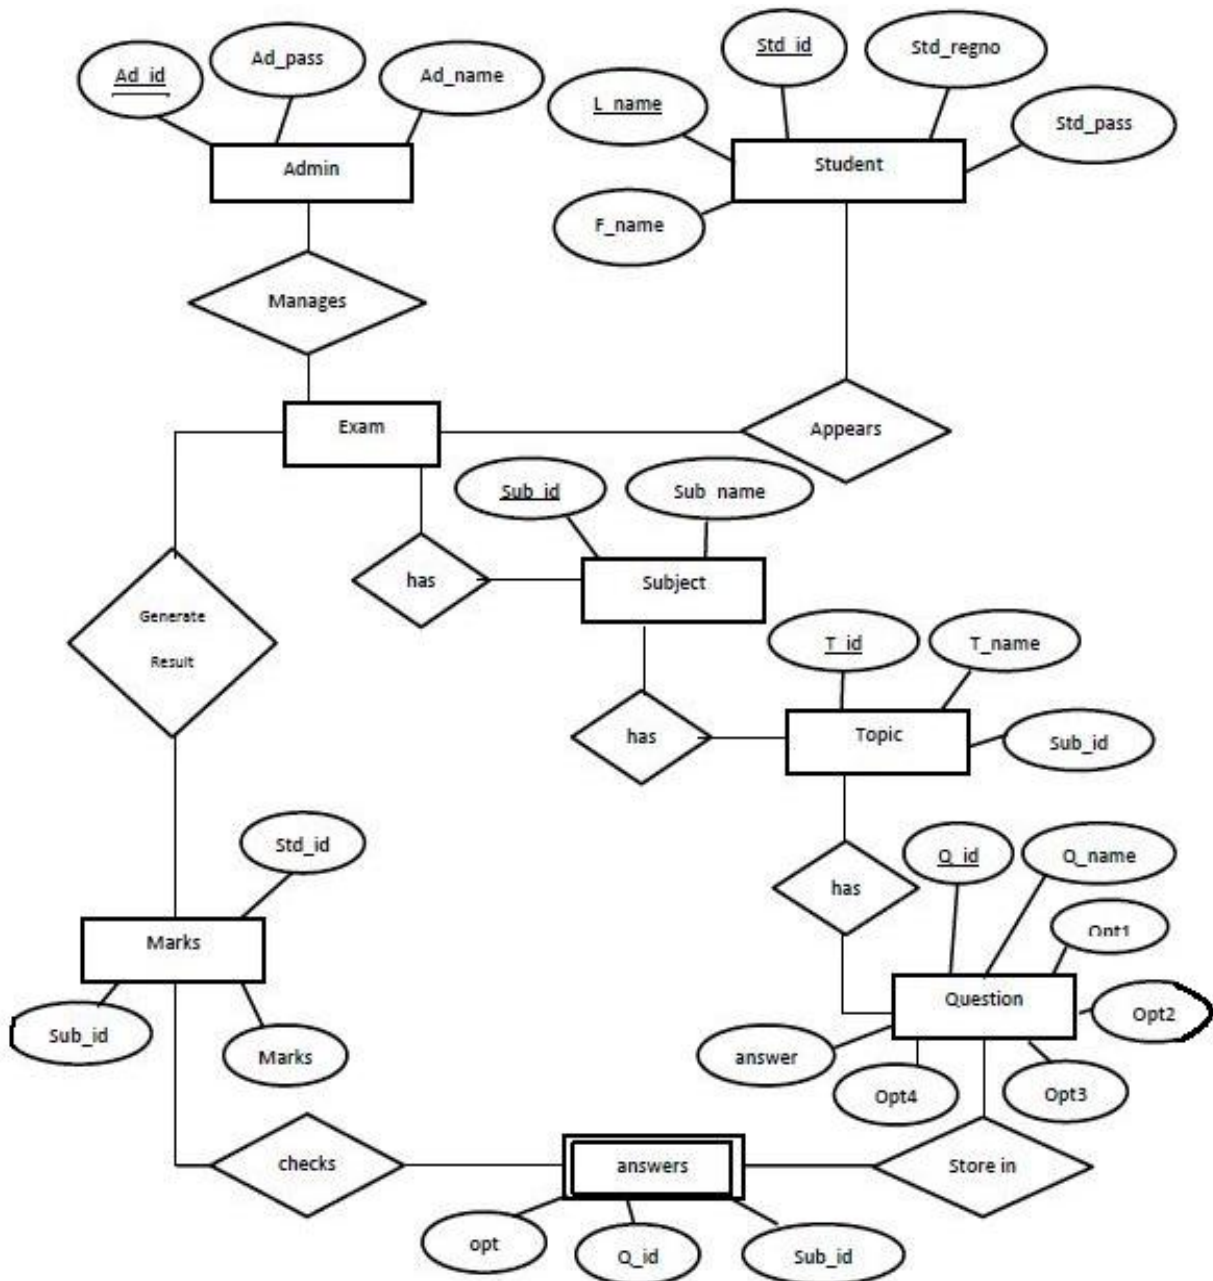

Processor: Intel core i5

RAM: 4GB

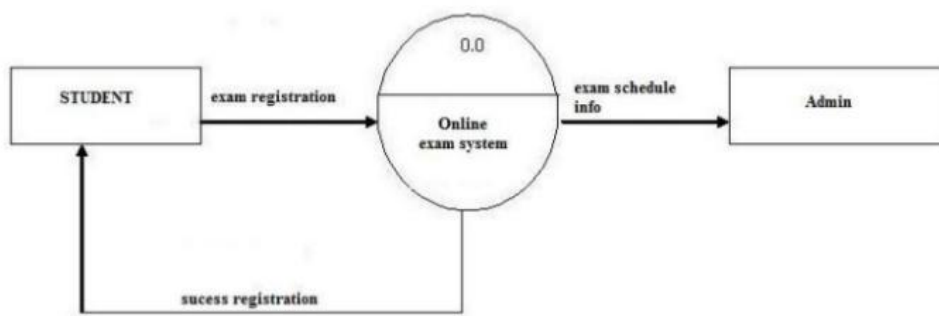

Hard Disk: 1TB

## Online Student Test

### INFORMATION PAGE:

The screenshot shows the 'Information Page' of the Online Student Test system. The browser address bar displays 'localhost/Online\_test\_final/school.php'. The page features a dark sidebar with navigation options: Dashboard, Subject, My Achievement, Information, School, College, University, Professional Institute, Teacher, Councillors, and Value Added Test. The main content area includes a dropdown menu for 'West Bengal' and a list of schools: St. Xavier's Collegiate School, Kolkata and La Martiniere For Girls School, Kolkata. A large banner for 'St. Xavier's Collegiate School' is visible, with the tagline 'For the greater glory of God'. Below the banner, there are sections for 'Announcements' and 'NOTICE', including links for 'ICSE / ISC March 2017.. Meet the Toppers ICSE / ISC March 2017' and 'Belvedere College Dublin 19th Student Exchange Program'. A 'See all awards' button is also present.

### MY PROFILE PAGE:

The screenshot shows the 'My Profile Page' of the Online Student Test system. The browser address bar displays 'localhost/Online\_test\_final/my\_profile.php'. The page features a dark sidebar with navigation options: Dashboard, Test Bank, My Achievement, Information, Value Added Test, My Profile (highlighted), My Account, and Logout. The main content area includes a profile card for 'Monikumari' with a status of 'Available'. Below the profile card, there are statistics for '45 Projects', '15 Awards', and '2174 Points'. A section titled 'Samuel's Awards' displays four award categories: Most Bright Idea, Most On-Time, Problem Solver, and Most Loved, with a 'See all awards' button. The 'Recent Activity' section shows two activities: 'Commented on post Prototyping' (2 minutes ago) and 'Uploaded new file Proposal.docx to project New Year Campaign' (7 hours ago).

### **Features of Online Student Test:**

- Easy to register and give test for online exams.
- It is completely secure.
- It can be completely controlled by admin.
- This system is easily compatible with most of the Android Phones and browsers also.
- It is very interactive and saves time.
- Reduces paper works.
- Students will be able to see all the test results and improve their skills.

### **Future scope of the work:**

- The development process of this system can be easily followed by adding new features to this application as the customer can command the application to take answer and submit it.
- We will add a payment gateway in this project.

### **Conclusion:**

This project will develop the knowledge and skill of students. It also saves paper work and saves the time. Students and parent as well will notify with email also about the marks. If the student is scoring good with his or her exam he or she will be upgraded to the next level otherwise he or she will be downgraded. Students or parent can check the best school or colleges or universities around all over India. Every student scored record will be stored and they can see it in a Bar-Graph.
